About Me

Hi, I'm Henk van der Schuur. Nice to meet you 👋

I love to build high-quality software solutions with teams of expert software engineers, fast. I believe in taking end-to-end responsibility, giving freedom, and being vulnerable. I'm a fast thinker, ambitious, loyal, perfectionist, pragmatic, aimed at getting the job done.

I'm a passionate quarter-maker, simplifying complex challenges, creating BizDevOps environments by driving change in the intersection between technology, business, and people.

I have more than 10 years of experience in software production, of which 7 years in software product management roles at AFAS Software.

I love cooking, wines, craft beer, swimming, running, philosophy, theology, and math.

Employment

Schuberg Philis

Software Accelerator Lead, 2019–present

- Helped 10+ teams deliver high quality mission-critical software, fast
- Launched the BizDevOps paradigm articulating Schuberg Philis' differentiating software development approach
- Developed result-based commercial models and software contracts, and implemented these at multiple mission-critical customers

Customer Director, 2017–present

- Delivering tailor-made (software) services for parties fundamental to the mission-critical backbone of The Netherlands, such as Royal Philips, Royal Schiphol Group, Port of Rotterdam, Heineken, the Dutch Pilotage (Nederlands Loodswezen), and others
- Building self-steering expert teams that are P&L responsible for the end-to-end life cycle of business-critical solutions, from PoC to MVP production go-live, to run

AFAS Software

Platform Manager, 2015–2017

- Co-developed the successor of the successful AFAS Profit product stack: AFAS NEXT Platform (now AFAS Focus), a fully generated, cloud-based ERP environment tailored to customer organizations through an ontological models of these organizations
- Co-founded the AMUSE research initiative: a collaboration between academic partners (Vrije Universiteit Amsterdam, Utrecht University) and industry partners (AFAS Software).

Product Manager, 2011–2015

- End-to-end responsible for the vision, design, build, delivery and roadmap of the AFAS Profit ERP software suite
- Shipped more than 150 projects across Profit Finance, CRM, Projects, Order Management, and Subscriptions to more than 10,000 customers in retail, education, healthcare, construction, wholesale and other industries
- Shipped workflow-, intranet- and website/portal functionality for each product module, expanding the generic feature set of AFAS Profit

Utrecht University, PhD Researcher, 2008–2011

- Conducted a full PhD research in less than 3.5 years including successful thesis defense. My research was directed at revealing the potential of software feedback, i.e., knowledge of in-the-field software operation, within Dutch independent software vendors
- Created Nuntia, a binary instrumentation and recompilation tool, which enabled easy software feedback acquisition and presentation for .NET assemblies
- Led an industry workgroup with software vendors from the Netherlands, bridging academics and industry to gain early feedback and share research results

Stabiplan (now Trimble), Senior Software Engineer, 2008–2011

- Designed, built, and ran a web application for acquisition and analysis of error reports and end-user usage traces
- Improved Stabiplan's StabiCAD software product as well as the organization's processes through utilization of software operation knowledge
- Built Lima, a software tool for software license generation and license fulfillment automation

DEVENTit, Junior Software Engineer, 2003–2008

- Co-developed Thematis, a web-based federated search platform providing theme-based access to heritage sources across multiple systems and institutions
- Co-developed Atlantis, a web-based collection management platform for archives and archaeological (government) institutions, museums, and other organizations with heritage collections

Education

- PhD in Information Science, Utrecht University, 2011
- Master in Information Science (Business Informatics research master), Utrecht University, 2008
- Bachelor in Computer Science (Business Studies minor), Utrecht University, 2006
- VWO (Natuur & Techniek; Informatica, Economie 1), Griftland College, 2003

Other

Tools and Techniques

- Business Intelligence: Qlik Sense, Tableau Desktop, Tableau Cloud
- Design: Adobe Photoshop, Illustrator, Adobe InDesign; Acorn; Affinity Designer; Pixelmator
- Collaboration and Communication: Slack; Microsoft Teams, Sharepoint, Planner, Project, Power Automate; Azure DevOps; Atlassian Jira, Confluence, OpsGenie, Trello
- Office: Microsoft Office 365; Apple iWork; Google Suite
- IDEs: Visual Studio; Visual Studio Code
- Programming: .NET, C#, ASP.NET MVC; HTML5; JavaScript; CSS; Microsoft SQL; LINQ
- Modeling: OmniGraffle Professional; Microsoft Visio
- Writing: LaTeX

Licenses, Training, and Certifications

- Tuff Leadership Training (Step 1, Step 2)
- Liberating Structures Immersion Workshop Practitioner
- AWS Certified Cloud Practitioner
- Passenger car (B); heavy motorcycle (AZ); passenger car with trailer (BE)
- PADI Advanced Open Water Diver
